PROFESSIONAL SUMMARY

Aspiring Python Developer with a strong foundation in computer science and practical experience through internships in Python development and AI/ML. Demonstrates problem-solving skills, code scalability, and dashboard creation to support decision-making. Developed AI-powered chatbots and full-stack applications with security features, aiming to grow and innovate in an entry-level Python Developer Intern role.

SKILLS

- **Languages:** Python, Basic JavaScript, HTML, CSS
- **Frameworks/Libraries:** Django, Bootstrap
- **Databases:** MySQL, SQLite
- **Tools:** Git, VS Code, Jupyter Notebook
- **Concepts:** CRUD, OOP, Data Analysis

EDUCATION

B.Tech in Computer Science Engineering, Sri Mittapalli College of Engineering (JNTUK) 2022 – 2026 | CGPA: 7.63
(Pursuing)

WORK EXPERIENCE

Python Developer Intern – Coding Brains (Remote)

Jan 2025 – Jun 2025

- Developed and deployed 5+ Python-based applications for automation and data processing, reducing manual effort by 40%.
- Designed and optimized RESTful APIs using Django, improving data exchange efficiency by 30%.
- Applied Data Structures and OOP principles to enhance code maintainability and scalability.
- Processed and analyzed 10,000+ structured records using NumPy and Pandas for insights.
- Improved application performance by 25% through algorithm optimization and exception handling.
- Created analytical dashboards and visualizations using Matplotlib for decision support.

Artificial Intelligence & Machine Learning Intern (Remote), InLighnX Global Pvt. Ltd. | Oct 2025 – Mar 2026

- Completed a 5-month internship focused on Artificial Intelligence and Machine Learning concepts, including model development and data processing.
- Gained hands-on experience in implementing ML algorithms, data analysis, and real-world problem-solving.
- Developed practical knowledge in Python-based AI/ML tools and techniques for building intelligent applications.

PROJECTS

Price Negotiating Chatbot with Text & Voice (AI & NLP)

- Developed an AI-powered chatbot using Python, Django, and NLP techniques for dynamic price negotiation with text and voice interaction.
- Integrated machine learning-based logic and REST APIs to deliver scalable, user-specific responses and improve engagement.

Employee Management System, OTP Authentication System | Django

- Built a full-stack web application with CRUD operations, authentication, and database integration.
- Implemented secure login using email-based OTP verification.

E-commerce Web Application

- Developed a full-stack e-commerce web application using Python (Django), HTML, CSS, and JavaScript to enable product browsing, user authentication, and cart management.
- Integrated database (SQLite/MySQL) for efficient data handling and order processing.
